ning of each regular issue of the PCT Gazette.*

(54) Title: **TYROSINE KINASE INHIBITORS**

(57) Abstract: The present invention relates to compounds that are capable of inhibiting, modulating and/or regulating signal trans-
duction of both receptor-type and non-receptor type tyrosine kinases. The compounds of the instant invention possess a core structure
that comprises a benzazocine moiety. The present invention is also related to the pharmaceutically acceptable salts, hydrates and
stereoisomers of these compounds.
